

These are the questions which I remember, options are not exactly the same as in exam but similar to these and I don't remember all the options. So, I've just given for the questions which I remember. Hope this will be helpful

1) How can an axis be created?

- a) Drag dimension to row shelf
- b) Drag measure to the view

2) In which Scenario live connection is preferred? [Must Question, can be on live or extract]

3) Which of the following is true about .tds file? [select all that apply]

Read thoroughly about the topics, as you may encounter 6-7 "select all that apply" questions. In my case I've got 6 questions of this type.

Don't give extra attention to the options you think are false.

4) Which of the following is true about a dimension? [select all that apply]

- a) Can be discrete or continuous
- b) It is always in blue pill
- c) Effects level of detail

5) Which of the following is true about a measure? [select all that apply]

- a) Can't be discrete
- b) Effects level Of detail
- c) It is always in a green pill

6) How can you apply different fonts to a single workbook [pane, header..etc]

Options are given, try all the options practically on tableau as sometimes they are so confusing and similar to remember.

7) Which of the following is a date part?

- a) February
- b) 01/08/2020
- c) 01 Aug 2020
- d) 01/08/2020 07:08:43

8) Which of the following can't be added by default aggregation or table calculation?

- a) Std dev
- b) Sample Covariance
- c) Percent Of total

9) Which of the following is "not true" about Viz Animations?

10) How can you save a viz as pdf file? [Practically check the options if you are not sure about the answer]

- a) File → Save as → pdf
- b) File → Print to pdf
- c) Presentation mode

11) In which of the following format dashboard image can't be exported in Tableau?

- a) .tff
- b) .jpeg
- c) .png
- d) .bmp

12) Which of the following is best to represent a part to whole relation?

- a) Pie Chart
- b) Stacked Bar

c) Area

13) What is the first step to add a Phone Layout?

14) How to add a Visual group?

HANDS ON:

Types of questions you may get. These are the questions which I've got

15) Perform a blend and find out City with highest tourists

16) Create a set and find the avg of members in the set

17) Create a dashboard and perform filter actions to find out company with high reviews?

18) Create a calculated field (diff between dates) and find order with highest delay

TIPS:

- ➔ Flag all the hands-on questions and solve them once you complete all the theory questions
- ➔ Solve the question related to blend in the last as it might affect the results for further questions and also a bit time taking
- ➔ For the theory questions which you want to google, flag them and do it in the last, as VM is very slow and it'll eat your time scrolling the pages [which is again too slow]

- ➔ Don't get panicked by seeing a long question assuming it to be complex, they'll be the easiest ones
- ➔ Read the hands-on question properly, especially what aggregation are they asking [avg, sum, max..etc]
- ➔ Don't use the shortcut keys
